

## PRAGANDA®

Nitrite pickling salt for home-made meat products

### Advantages:

- pure natural salt
- affects the taste and color of home-made meat products
- content of sodium nitrite max. 0.3%

### Field of application

PRAGANDA® - nitrite pickling salt combines the microbiological and technological advantages of rock salt, sodium nitrite and sugars. The homogeneous mixture ensures first-class technological safety and guarantees long-lasting, tasty meat and sausage products.

Pickling is one of the oldest methods of conserving meat and meat products. Pickling conserves meat products and gives them their characteristic red color.

### Product

PRAGANDA® - nitrite pickling salt for home-made meat products is a homogenous mix containing food grade rock salt, sodium nitrite and sugars intended for household use. It should not be used for direct food flavoring without subsequent heat treatment, since it contains sodium nitrite.

- Pickling color build-up
- Pickling taste build-up
- Anti-oxidative effect
- Microbiological effect
- Content of sodium nitrite max. 0.3%
- Constant quality control

### Product properties

The product is produced in batches and offers a homogeneous mixture of salt, sodium nitrite and sugars. The product's excellent pouring properties and ideal grain size make it convenient to use and guarantee the best results for preserved goods. By using nitrite pickling salt, a highly stable meat color is achieved and the characteristic preserved flavour develops. The product does not contain allergens and GMO.
