

Food grade rock salt

Naturally pure food grade rock salt for food production

- Pure rock salt
- Various grain sizes

Field of application

Food grade rock salt is a pure natural product and is used as a flavouring agent and preservative product in the production and processing of food.

Product

Food grade rock salt is obtained from naturally pure rock salt. Due to different grain sizes and eventually a content of iodine it is suitable for different applications, for example for a preparation and decoration of baked goods. The products do not contain allergens and GMO.

- Rock salt from ancient seas
- Naturally pure food grade salt
- Constant quality control
- Different grain sizes
- Also available iodized

Product properties

Food grade rock salt is made from pure and natural rock salt and is ideal for use in the food industry. Perfect grain sizes, pouring properties and natural purity are the hallmarks of Food grade rock salt.

Product quality

The deposits for Food grade rock salt are located in the north of Germany. They feature a naturally high proportion of pure white crystals. Food grade rock salt satisfies the requirements of the Codex Alimentarius and the FCC VII.

Certification

The company holds a valid certification according to ČSN EN ISO 9001:2009. Strict compliance with hygiene requirements is confirmed by the HACCP system.

Service

We offer our customers quality service, ensuring high product quality and reliable deliveries.
